

Disruptive Innovation

Planting churches within a dominate American consumer culture requires tools, experience, and learning that have not previously existed in the toolboxes of most church leaders. We are recapturing our connectional heritage through the **Syndeo Project** model, which is contained in a cohort structure. Do you feel called to plant a new church?

Creating new places for new people in our post-Christian context, requires innovation, creativity, a unique ability to create something where nothing exists (on every level), a willingness to reconcile strategic risk with bold steps of faith, an understanding that success does not come without failure, and a deep spiritual maturity that is rooted in Scripture.

The **assessment process** for potential church planters consists of 8 phases, which include: (1) Recruiting, (2) Inquiry, (3) Initial Screening, (4) Initial Assessment, (5) In-depth Screening, (6) Assessment Interviews, (7) Assessment Follow up, and (8) Recommendations for Deployment. **Interested in learning more?
